PROJECTS

Student Artco — *Full Stack Developer*

Tech stacks utilized: React | GraphQL | Apollo | Heroku | ExpressJS | Node

Link to Frontend | Link to Backend

Description: A web merchant application (with Android/IOS ports) for high schools to sell artwork made by their students.

-Engineered and maintained the hosted back-end with a team member, led the debugging for the mobile team

-Developed the merchant account front-end portion with a schema drawn by our designer

-Made a sale within a month after the second release canvas, the first project in our organization to turn a profit

Lambda Lifts — *Backend Developer, Project Manager*

Tech stacks utilized: React | Netlify | Node | ExpressJS | HTML | CSS

Link to Github Repo

Description: A React-based weight lifting progress journal.

-Developed the back-end within two days time, to ensure that other students had support

-Managed a team of 7 people, making sure students stayed on task and kept up-to-date notes

-Collaborated with the frontend team to produce a functioning application and brought it to presentation

EXPERIENCE

Lambda School, Remote — *Team Lead*

July 2019 - October 2019

-Managed and mentored a team of 9+ students through core curriculum, including Build Week Projects

-Held daily 1:1 code reviews, Zoom meetings and coding tutorials for students, managing 10 code reviews in two hours

-Instructed students on how to develop and code that supplemented their main lessons, for at least two hours a day, three days a week

SKILLS

HTML | CSS | React | React-Redux | NodeJS | ExpressJS | GraphQL | Heroku | Netlify | Python

EDUCATION

Lambda School, Remote - CS/Web Development

March 2019 - June 2020

Washington State University, Pullman, WA - B.A. in Philosophy

August 2011 - May 2015
